

## Adding Content on the Main Site

You can also add your art, talent, creativity, etc to the Main Site. There are sections dedicated to different subjects like tattoos, modeling pictures and more. These items will not show up on your Personal Profile page unless you add them there as well.

The best part about adding your art, talent and creativity to these pages on the Main Site is that it is easier for people to see your art. Then they can also vote and comment on it.

Artists with the most votes get to graduate to The Purple Carpet. That is, your popularity earns you a spot on The Purple Carpet. This is another way to expose people to your art.

Begin by logging into the site. There are two ways to get to the login page:

1. Click on the Login Button on the top right of the site
2. Or click on the button that says "User" located on the right of the homepage just under the site's navigation bar

Once you are signed in an Add Content button will appear on the top left hand corner of the site. It has a drop down menu for the other pages on the site. Each drop down option is dedicated to a specific subject. The drop down options are:

1. Blog
2. Events/Shows/New Releases
3. Model Images
4. Purple People Tattooed
5. Purple Portfolio

Most of content you add to these sections will be accessible from the Main Site's navigation menu/bar. That is, no matter where you are on the Main Site, the content you add to this drop down will be available just by clicking on the site's navigation.

The only exception is Events/Shows/New Releases which will only be accessible from the Main Site's Home page.

In most cases, you can add any type of content that you want to these pages on the Main Site, including images, text, YouTube videos, SoundCloud audio files and more.

It is very important to remember to **click the save button**. AFTER you have added or deleted anything to the main site you have to click the save button at the bottom of the page.

If you do NOT **click the save button** at the bottom of the page the videos, music, images (pictures), etc.

## 1. Blog

Blog posts will display in chronological order with the newest entries on top. You will have the option to provide a display icon. This image will show next to blog post listing on the site. You can also add other images and video that will show up within the blog. This is the place to express your opinion. To share your work, you may prefer to use one of the other sections.

Display Icon:

- Click on the Select media button. You can add: png, gif, jpg or jpeg. Here you are uploading an image to display throughout the website, attached to your blog post. It is like cover art for the blog post.

Within Blog:

- To add an image inside the blog post go to the Images section. Click the button that says Select media button. Images can be: png, gif, jpg or jpeg. You can also add: video, audio or something from the library.
- There are several ways to add video or audio:
  - First, click on the Select media button in the Images section. There is a tab you will see there that says Web.
    - Then input a url or embed code from one of the listed providers to upload video or audio.
    - You will also see a tab for the Library and you can add something from there as well.These will also show up in the blog post.
  - Secondly, in the Blog Video section click Select media to upload: avi, mp4, mpeg, mpg or wmv.
    - There is also a Web tab here for YouTube or SoundCloud.

- And the Library tab to add something already in the library.

It is very important to remember to **click the save button**. AFTER you have added or deleted anything to the main site you have to click the save button at the bottom of the page.

If you do NOT **click the save button** at the bottom of the page the videos, music, images (pictures), etc.

## 2. Events/Shows/New Releases

Events/Shows/New Releases or any other forms of art, talent and creative things that you are wanting to promote for that matter, will show up on the Home page. These are advertisements. You can create any type of promotion you like and it will show up on the Home page to be seen by everyone.

- Add a Title
- Add text in the Body
- Use the Flyer section to upload images. Click on the Select media button. Images can be: png, gif, jpg or jpeg.
- Once in the Flyer section you can also upload video or audio. Click on the Select media button. Click on the tab that says Web. Then input a url or embed code from one of the listed providers. You will also see a tab for the library and you can add something from there as well.
- Then add Dates

It is very important to remember to **click the save button**. AFTER you have added or deleted anything to the main site you have to click the save button at the bottom of the page.

If you do NOT **click the save button** at the bottom of the page the videos, music, images (pictures), etc.

## 3. Model Images

The Model page is a place for models to upload their modeling media.

- Click the button that says Select media to upload images. Images can be: png, gif, jpg or jpeg.

- To add video or audio, click the button that says Select media. Then click on the tab you will see there that says Web. Then input a url or embed code from one of the listed providers to upload video or audio.
- You will also see a tab for the library and you can add something from there as well. Click the button that says Select media. Then click the Library tab.
- You can also add text. Add your name, title the image and fill in the Body section.

It is very important to remember to **click the save button**. AFTER you have added or deleted anything to the main site you have to click the save button at the bottom of the page.

If you do NOT **click the save button** at the bottom of the page the videos, music, images (pictures), etc.

#### 4. Purple People Tattooed

- Click the button that says Select media to upload images, video, audio or something from the library. Images can be: jpeg, jpg, tiff, gif, png or bmp.
- To add video or audio, click on the tab you will see there that says Web. Then input a url or embed code from one of the listed providers to upload video or audio.
- You will also see a tab for the library and you can add something from there as well.
- Add text in the Body section.

It is very important to remember to **click the save button**. AFTER you have added or deleted anything to the main site you have to click the save button at the bottom of the page.

If you do NOT **click the save button** at the bottom of the page the videos, music, images (pictures), etc.

#### 5. Purple Portfolio

If you are a musician, band, singer, comedian, dancer or have anything that is images or video you can add those things on the Purple Portfolio page. This is the place to raise awareness, to Showcase YOUR hard work and dedication for the world to see (not to be confused with "Blog"). If you would like to express your own opinion, links to other sites, etc. head on over to the Blog page. You will also have the option to provide a display icon.

#### Purple Media section:

- Click the Select media button. You can add: avi, mp4, mpeg, mpg, wmv, mp3, ogg, wav, jpeg, jpg, tiff, gif, png or bmp.
- You can also add video or audio by clicking the Select media button. Then click on the tab that says Web. Then input a url or embed code from one of the listed providers to upload video or audio.

#### Display Icon:

- Click on the Select media button. You can add: png, gif, jpg or jpeg. Here you are uploading an image to display throughout the website, attached to your portfolio entry. You need to upload a picture of the video from your computer to have the face of the video show up on the site. It is like cover art for the portfolio entry.

#### Add text:

- Use the Project Info section to describe your portfolio entry.

It is very important to remember to **click the save button**. AFTER you have added or deleted anything to the main site you have to click the save button at the bottom of the page.

If you do NOT **click the save button** at the bottom of the page the videos, music, images (pictures), etc.
